

The Complete Dust Suppression Solution

With Australia's increasing demand for effective dust suppression across all industries as well as new legislation regarding suppression and dissemination of silica dust, the BBW1000 DUST has been created to meet and exceed all expectations.

The BBW1000 DUST is the latest Bowser Trailer from the team at Brendon Powerwashers. Utilising their unique and revolutionary high-pressure cleaning system, this machine now offers users a comprehensive and versatile approach to dust suppression for all environments.

Highly effective for construction Site Dust Suppression with indoor & outdoor demolition works, wastewater treatment plants, asbestos removal, silica dust suppression, recycling industry applications, mining sites and even odour control.

Capabilities

This machine comes complete with a fixed DT400 Dustec Rear Mounted Misting Canon, High-Pressure Spray Bar and Low-Pressure Whale Tail for increased ground cover. For added versatility, it also comes equipped with a fire/dust lance for added user control suppression.

It can be easily transported around and to each job site with ease and with it's own Diesel Engine you don't need any onsite power sources to use.

The rear mounted Dust Canon is environmentally friendly with approx 60% of the water to drive the fan and generate the air flow needed. The water is then recycled ensuring a controlled amount of water is delivered for suppression.
